HEATING, PIPING & AIR CONDITIONING

including the Journal of the American Society of Heating and Air-Conditioning Engineers

Index for 1955
Vol. 27, Nos. 1-12

For convenient use, the articles indexed have been classified and subclassified under the major headings and under sub-headings. They have also been classified as general, fundamental, and by types of plants and buildings. There is also an index by authors.

"Most Information, Most Authoritative, Most Quoted"

HEATING, PIPING & AIR CONDITIONING regularly runs more pages of editorial material on the subjects of heating, piping, and air conditioning in industrial, commercial, institutional, and public buildings than any other publication. During 1955, for example, there were 191 pages on heating, 164 pages on piping, and 400 pages on air conditioning — in addition to many, many pages of news, equipment developments, a complete Directory Section, etc. . . . . By actual count, articles in HPAC are "most quoted" in the leading text-books and handbooks in the field. . . . . HPAC's articles are written by authorities actively engaged in the field served. . . . . Its editorial staff has had many years of experience in the field served, and in editorial work.

[Heating, Piping & Air Conditioning is indexed regularly by Engineering Index, Inc., and Industrial Arts Index, and is Micro-filmed by University Microfilms.]

Heating, Piping & Air Conditioning

January-December 1955 — Vol. 27, Nos. 1-12

Published monthly by the Keeney Publishing Company, 6 N. Michigan Ave., Chicago 2, Ill.

The index to the JOURNAL SECTION of the AMERICAN SOCIETY OF HEATING AND AIR-CONDITIONING ENGINEERS is separate (see page xx).

This index does not include Equipment Developments; Recent Trade Literature; Meetings & Conventions; Who's What—departments appearing regularly in each issue. The Editors' Pages in each issue include items of news, comments on current events, etc. In the January issue a complete directory section was published covering heating, piping and air conditioning equipment for industry and large buildings.
